

Project Overview

BSH CR UX Jam

GS/BDU

V3.0 | Oct. 2025

AGENDA

01 Project objective

02 User research plan

03 Project team and timeline

Project Objective

Core function innovation

(Hygiene & Freshness Keeping)

- Deliver use cases from unmet user needs
- Validate concepts through prototypes

Assist food management

(Digitalization)

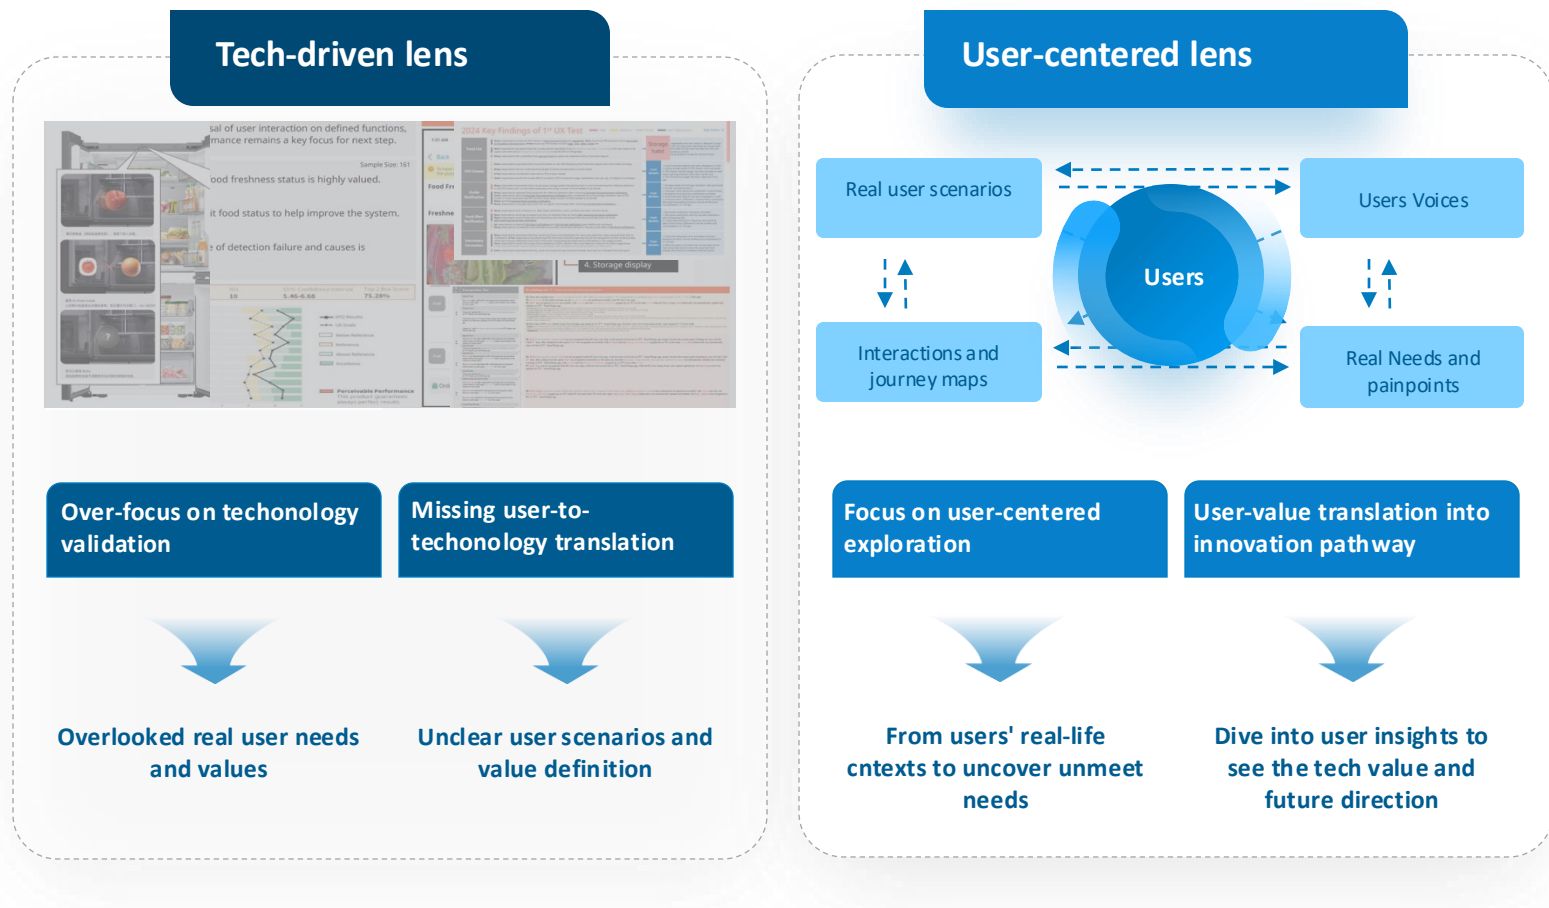

- Deliver use cases from unmet user needs
- Define value proposition and strategic direction based on user value, market strategy, and technology potential

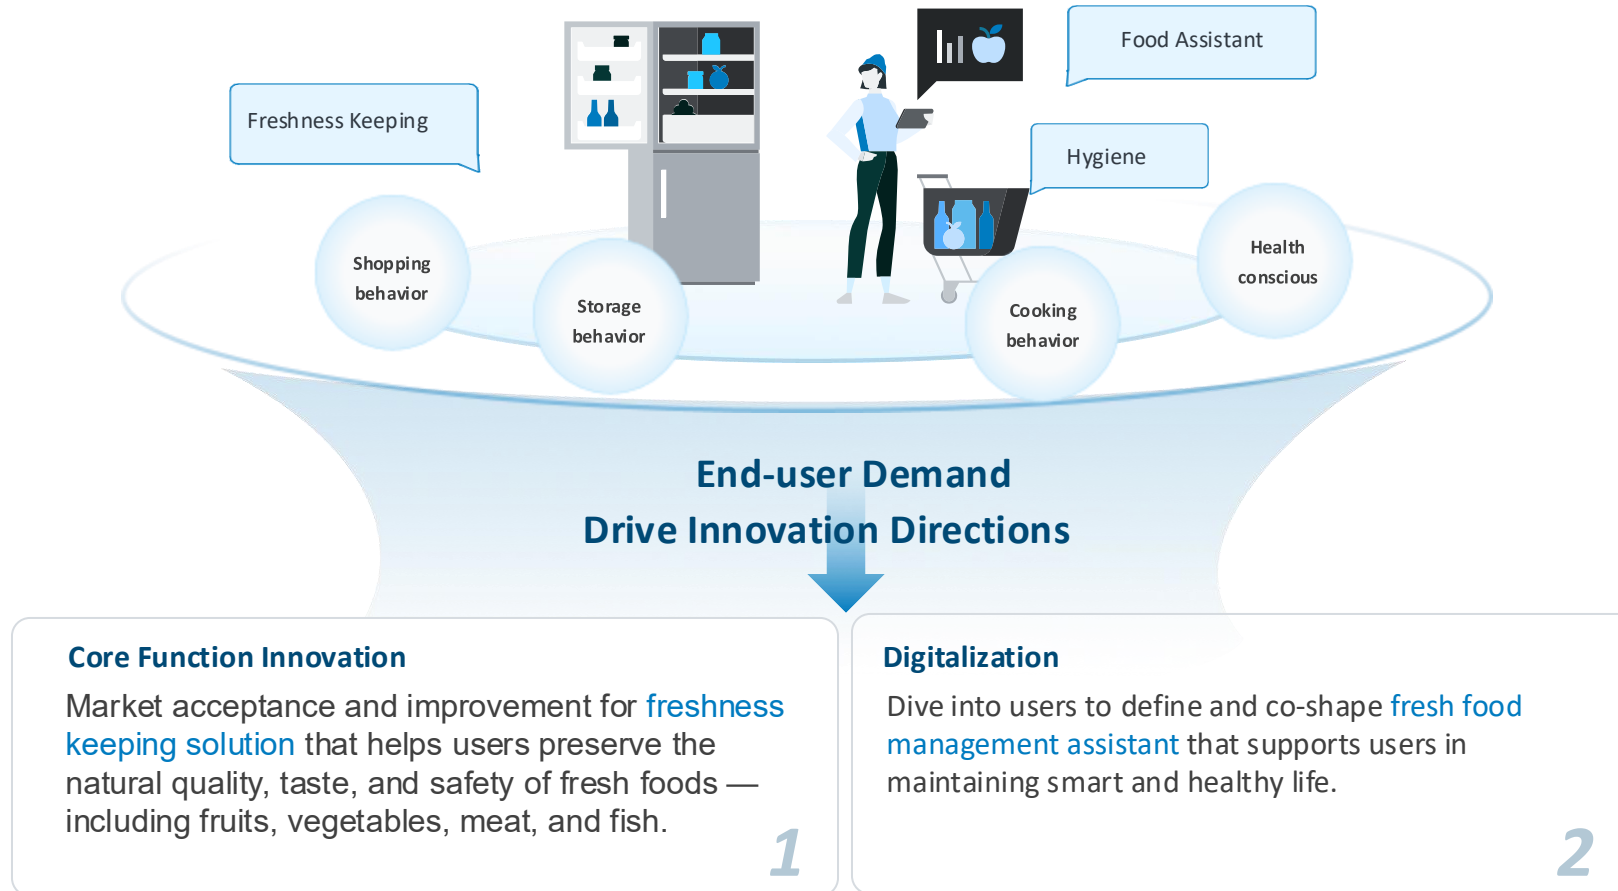

Project Background

Previous feature delivery with advanced technology has been achieved; however, several value propositions remain insufficiently defined, with limited confidence in user demand–function fit, thereby elevating delivery risk and diluting market impact.

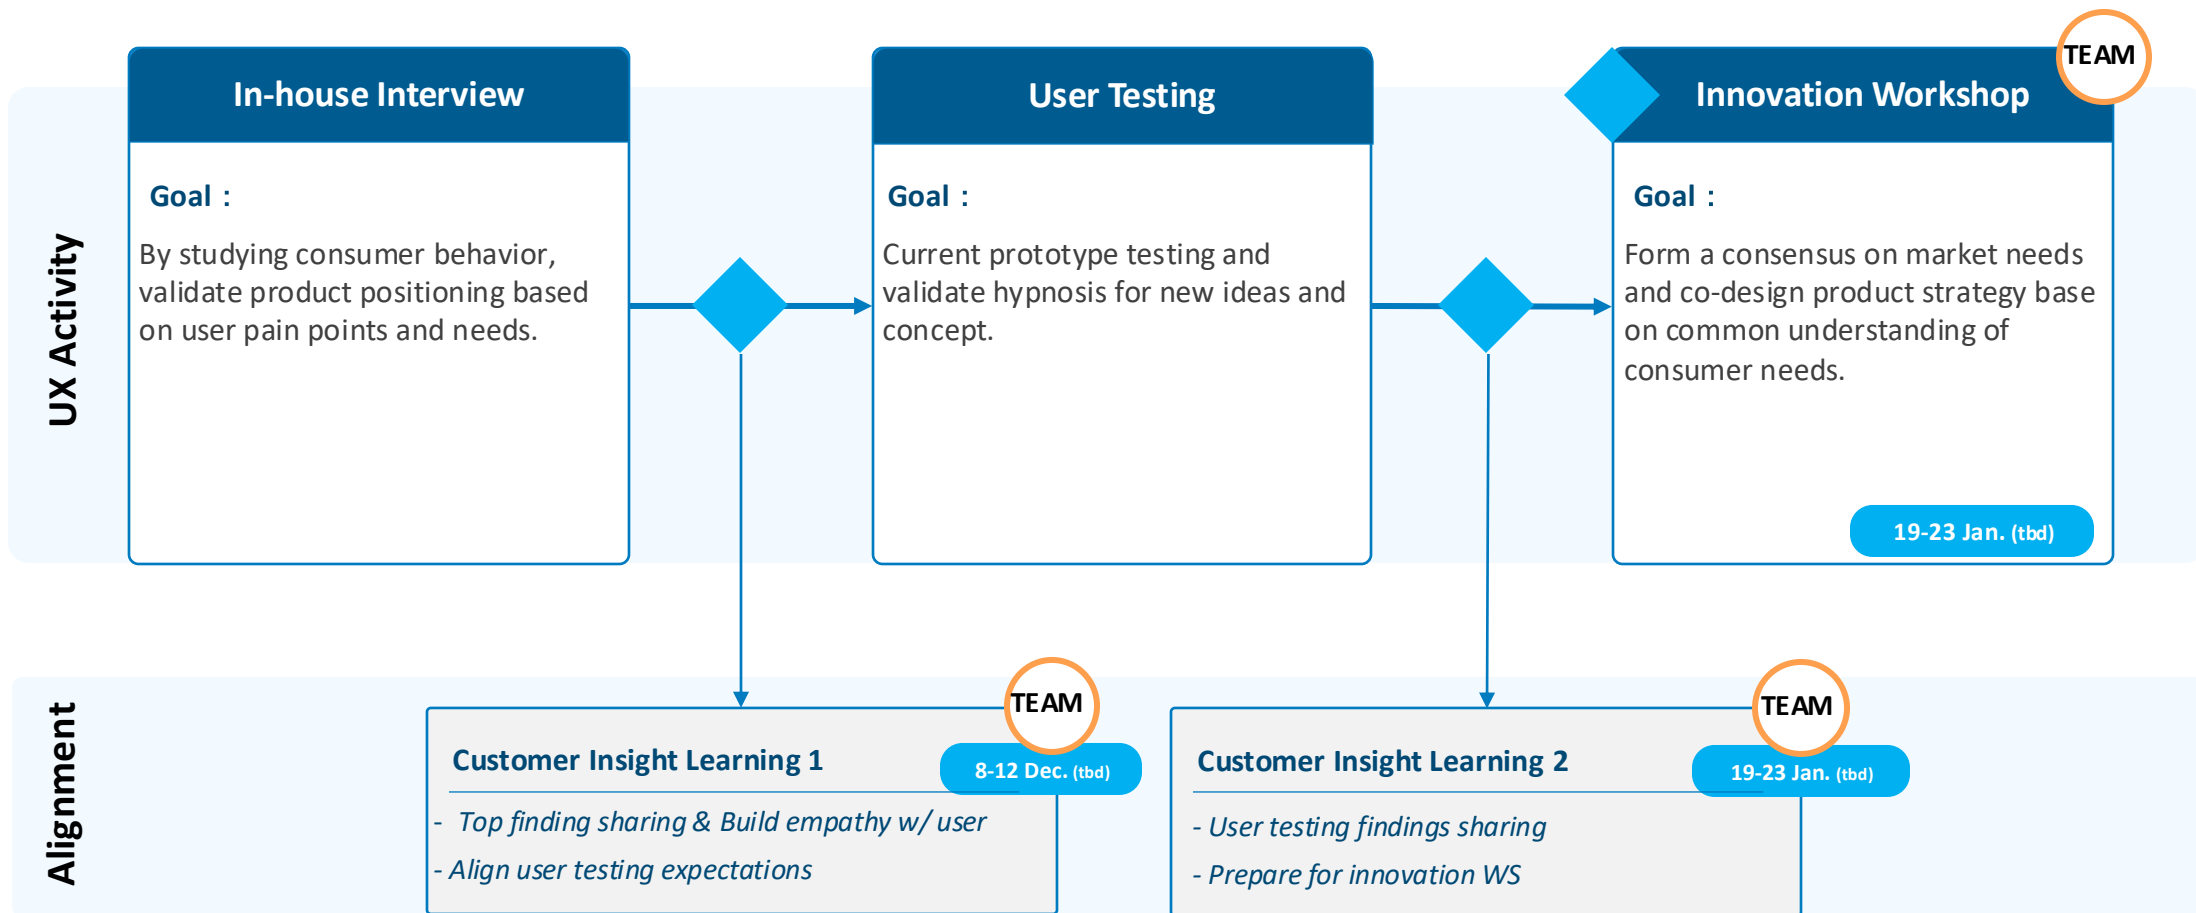

The project aims to identify unmet user needs and pain points, and to deliver clear and actionable use cases.
